

# Das Pronkinthema in orthodoxen Beweispartien

Silvio Baier

26. Januar 2014

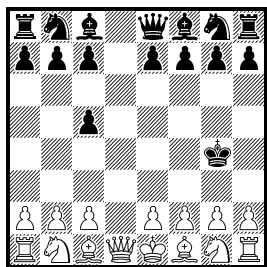

Dieses Dokument umfasst eine Sammlung von orthodoxen Beweispartien, die das Pronkin-Thema (ein Originalstein wird geschlagen und auf seinem Ursprungsfeld durch einen Umwandlungsstein gleicher Art und Farbe ersetzt) beinhalten. Dabei wird nur die jeweils beste Darstellung angegeben. Die Rekordkriterien sind (in dieser Reihenfolge) möglichst wenige Schlagfälle, möglichst wenige Züge, möglichst viele Steine auf den Partiausgangsfeldern (inklusive Pronkin- und Sibling-Steinen). Gibt es eine Version mit Partietsatzmaterial und eine mit über den Partietsatz hinausgehendem Material, die sonst Rekord wäre, so sind beide Versionen angegeben.

Im ersten Teil sind die Fälle ohne einen einzigen unthematischen Schlagfall (ökonomische Pronkins) zusammengefasst. Dabei bezeichnet die Notation T[T] einen Doppelpronkin, bei dem der erste Pronkinturm als Originalstein für den zweiten Pronkinturm fungiert, also z.B. Ta1 wird geschlagen, wB wandelt in T um und begibt sich nach a1. Dieser Turm wird dann irgendwo geschlagen und durch einen weiteren Umwandlungsturm ersetzt. Diese Kombination ist ohne unthematische Schlagfälle noch unbewältigt.

Im zweiten Teil sind alle im ersten Teil fehlenden existierenden Pronkinkombinationen zusammengefasst.

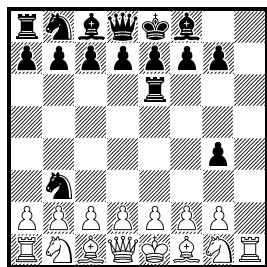

## 1 ökonomische Pronkins
